KRISH SINGH

Nagpur, India | connecttoks10@gmail.com | linkedin.com/in/krish-singh-66b0461b5 | github.com/KRISH-SINGH-10

SUMMARY

Third-year Computer Science undergraduate (CGPA 10.0/10) who builds and ships AI products end to end: LLM agents, document AI and computer vision pipelines. Led the team that won 2nd place at Hackyard 2026 (IIT Guwahati) with a WhatsApp AI agent running live for a real shop.

EDUCATION

Ramdeobaba University, Nagpur | B.Tech in Computer Science and Engineering | CGPA: 10.0/10 2024 – 2028

Class XII: School of Scholars, Nagpur (78.6%) | Class X: Bhavan's B.P. Vidya Mandir, Nagpur (94.4%)

PROJECTS

Udhaar Agent | AI Credit-Ledger Agent for Kirana Shops on WhatsApp | github.com/KRISH-SINGH-10/udhar-agent Oct 2026

Team Leader, 2nd Place at Hackyard 2026 | TypeScript, Node.js, PostgreSQL, Docker, LLM API, ElevenLabs Speech-to-Text, WhatsApp (Baileys)

- Built a WhatsApp AI agent that turns shopkeepers' voice notes and texts in Hindi, Hinglish, Marathi and English into credit ledger entries, confirmed by the customer on their own WhatsApp.
- Automated payment collection with up to 3 reminders per due date, UPI QR codes and owner approval for cash claims.
- Designed an LLM pipeline that returns strict JSON checked by fixed safety rules, falling back to offline rules if the model fails.
- Deployed live on Agent37 with PostgreSQL row-level security; passes 900/900 live test cases and 483 automated tests.

Drone Data Augmentation Pipeline | Research Project, IIT Bombay Aug 2026 – Present

Python, PyTorch, CUDA, 3D Gaussian Splatting, SMPL-X, Habitat-GS, Rerun | github.com/KRISH-SINGH-10/Layer3-IITB-V1

- Built a scene-aware human motion engine that animates multiple photorealistic SMPL-X actors inside 3D Gaussian Splatting digital twins of real-world scenes.
- Planned collision-free walking routes on navigation meshes using GAMMA for realistic multi-actor movement.
- Automated labelled 1080p multi-camera drone-view video generation to augment training data for drone vision models, on an NVIDIA DGX B200.

Rebuttal | AI Dispute Resolution Agent for PayPal Sellers | github.com/KRISH-SINGH-10/Rebuttal Oct 2026

Next.js, TypeScript, Google Gemini, PayPal Agent Toolkit, AG Grid, Render

- Built an AI agent that investigates PayPal disputes and recommends whether to fight, offer or refund, with source-cited evidence.
- Enforced human-in-the-loop control: the chosen action runs only after seller approval. Built an AG Grid dispute dashboard; deployed on Render.

ClaimClear | Insurance Claim Verification Platform | github.com/KRISH-SINGH-10/ClaimClear Oct 2026

Python, FastAPI, Google Gemini, Google Cloud Run, Firestore, Cloud Storage

- Built a web app that audits hospital bills against insurance policies line by line, citing the exact policy clause behind every deduction.
- Combined AI document extraction with a deterministic rules engine to calculate payouts; added an insurer review portal and Hindi/Marathi explanations.

Other projects: Interview Flow, AI mock interview coach (React, Gemini, MediaPipe), Jan 2026 | Emergency Evacuation Route Finder, BFS/DFS/Dijkstra/A* visualizer (Python, Tkinter), Nov 2025

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

AI / ML: LLM Agents, Google Gemini, Structured LLM Output (JSON), Speech-to-Text, Computer Vision, MediaPipe, 3D Gaussian Splatting, SMPL-X, Scene-Aware Motion Synthesis (SceMoS)

Frameworks: FastAPI, Next.js, React, Node.js, PyTorch, Vite, Tailwind CSS, Tkinter

Cloud and Tools: Google Cloud (Cloud Run, Firestore, Cloud Storage), PostgreSQL, Docker, Render, Agent37, Git, GitHub, CUDA

ACHIEVEMENTS AND ACTIVITIES

- **2nd Place, Hackyard 2026**, IIT Guwahati (offline finals): led a 3-member team that built and presented Udhaar Agent.
- **Academic Excellence Award**, Ramdeobaba University, 2024 and 2025.
- **Member, REEF** (Ramdeobaba Engineers for Environment Forum): campus and city sustainability drives with NGOs and the Forest Department.
